The science of psychology is a rapidly evolving field that influences all aspects of society. Psychologists work in traditional and nontraditional settings, including schools, hospitals, businesses, government, mental health organizations, laboratories and nonprofit organizations. We offer a wide array of courses that provide contemporary instruction in the major areas of the field. You can focus on a particular concentration, or sample more broadly among a wide variety of courses. Regardless of the approach you take, you'll graduate with a firm grasp of the field and a solid foundation for further education or fulfilling careers.

With more than 25 full-time, Ph.D. faculty, abundant opportunities for hands-on learning and courses offered in seven concentrations, our program provides you with a solid foundation to build upon.

- Clinical Psychology
- Cognitive and Instructional Psychology
- Developmental Psychology
- Neuroscience and Behavior
- School Psychology
- Social Psychology
- Industrial/Organizational Psychology

Minors in Psychology or Cognitive Studies are also available.

**Fields of Study**

**Engaged Learning**

Research: All students majoring in psychology participate in a sequential set of learning experiences designed specifically to provide them with practice in conducting psychological research. You'll collaborate in groups to design a research study, conduct data analyses, write research reports and present findings.

Independent Study: You can enroll in independent study and receive course credit for working in a research lab or working with a faculty member on a research project.

Internships: An internship experience gives you a competitive edge by providing real-world experiences that complement your in-class work.

Departmental Undergraduate Research Conference: All students have the opportunity to present original research at this annual event. You'll prepare a poster to showcase your work, present findings and answer questions about your research. Faculty judges evaluate the quality of the posters and presentations.

Join SPA! The Student Psychological Association (SPA) is a student-run organization open to all majors. Join us to get to know our faculty, learn more about research experiences and find great volunteer opportunities.

**What can I do with this degree?**

More than half of all psychology majors seek full-time jobs immediately upon graduating. Our graduates with bachelor's degrees in psychology have entered these fields:

- Advertising
- Basic and applied research/development
- Business merchandising, research and sales
- Child care professional
- Community mental health worker
- Employment counselor
- Foster care worker
- Job evaluation/performance evaluation analyst
- Marketing and public relations
- Personnel selection and placement
- Probation and parole officer
- Social worker
- Technical/scientific writing
- Health-related service

According to the U.S. Bureau of Labor Statistics, employment of psychologists is expected to grow 22 percentage through 2020, faster than the average for all occupations. Psychological services in schools, hospitals, mental health centers and social service agencies will be in greater demand. Job prospects are best for those with a doctoral degree in an applied specialty and those with a specialist or doctoral degree in school psychology.
PSYCHOLOGY AT NORTHERN ILLINOIS UNIVERSITY

Degree Requirements

We offer both the B.A. and B.S. degree option. Either program can be used to gain certification to teach social sciences at the junior and senior high school levels. A departmental honors program is offered for qualified majors. Successful completion of the program leads to graduation with honors in psychology.

Major Requirements

Total Hours for a Major in Psychology:
38-51 (B.A.) or 49-51 (B.S.)

Requirements in Department (35 credit hours)
PSYC 102 Introduction to Psychology
PSYC 305 Research Methods

Two of the following:
PSYC 410 Experimental Psychology: Perception
PSYC 411 Experimental Psychology: Conditioning and Learning
PSYC 412 Experimental Psychology: Human Learning and Memory
PSYC 413 Clinical Psychology Laboratory
PSYC 431 Physiological Psychology
PSYC 433 Social and Personality Laboratory
