Making Videos and Screencasts

Kaltura Capture

  kaltura-capture.shtml
- Lives outside courses in BB (main panel tools)
- Works for students

Voicethread
  •  https://keepteaching.niu.edu/keepteaching/workshops/creating-recorded-presentations-with-voicethread.shtml
  •  Works for students
  •  “narrated presentation”
  •  Advantage here seems to be a “slide-based” organization (ie presentation is automatically broken into discrete chunks)
  •  Disadvantage is that doesn’t support groups – each person creates their own thing. Except you could have one person create and then others add comments on top of that. Maybe would work?
